"Compliance Training" For Hazardous Materials & Dangerous Goods In Transportation

Why Train At Airpack?

In today's complex world of regulations and compliance, employees who work with the subject of hazmat on a day to day basis need to be trained by a company who will not overwhelm them with too much. Airpack's dangerous goods training will provide trainees with the necessary information they need to complete their tasks & mission objectives .

What Makes Our Training Program Distinctive?

For over 15 years Airpack, Inc. and John Gerrish & Associates have been training & certifying employees and associates of Fortune 500 companies in all forms of specialized cargo & supply chain management solutions. We are the most recognized experts in our fields. Our proven track record and course materials have been relied upon by our students to stay within regulatory compliance. Our team of highly trained experts deliver solutions to complex shipping requirements.

Benefits Of Training With Airpack :

- We believe in training no more than 25 students at a time which allows for a more personable training experience.
- Our students are given a tour and are shown real shipment scenarios several times throughout the course of their training.
- We provide students with the knowledge to navigate and understand all the regulations.
- We train the steamship lines, forwarders, airlines, shippers, and truckers in one classroom where they can interact & discuss each others issues and challenges.
- Students may complete their "recurrent" certification "online" after they receive a good foundation in our classroom setting.

Where Other Training Companies Fail...

Our training bridges the fundamentals of U.S. DOT regulatory compliance to all modes and international regulations. Airpack provides the specific requirements for each and every mode of transportation unique to the enforcement of those regulations. Ex: Intermodal container requirements specific to U.S. Coast Guard & DOT regulations in addition to the IMDG Regulations.

The Airpack Training Experience

Our "intuitive" approach reviews and delivers required regulatory information processes unique to the hazmat industry. Airpack students leave our training program feeling confident and capable of shipping dangerous goods. Our commitment to our students is to provide them with the necessary knowledge and confidence to help them meet regulatory compliance. We don't cut the "umbilical cord" once they have completed the training. Airpack offers its trainees year round "consultation" and "regulation updates" **free of charge**.

Outline Of Airpack Courses:

Who needs to be trained...

The following two paragraphs will properly identify whether your company or employees should be hazmat trained:

HAZMAT EMPLOYEE - Definition from 49 CFR (171.8) means a person who is employed by a hazmat employer and who in the course of employment directly affects hazardous materials transportation safety. This term includes an owner-operator of a motor vehicle which transports hazardous materials in commerce. This term also includes an individual, employed by a hazmat employer who, during the course of employment:

- loads, unloads, or handles hazardous materials;
- manufactures, tests, reconditions, repairs, modifies, marks, or otherwise represents containers, drums, or packagings as qualified for use in the transportation of hazardous materials;
- prepares hazardous materials for transportation;
- is responsible for safety of transporting hazardous materials;
- operates a vehicle to transport hazardous materials.

HAZMAT EMPLOYER - Definition from 49 CFR (171.8) means a person who uses one or more of its employees in connection with: transporting hazardous materials in commerce; causing hazardous materials to be shipped in commerce; or repairing, or modifying containers, drums, or packages as qualifying for use in the transportation of hazardous materials. This term includes an owner-operator of a motor vehicle which transports hazardous materials in commerce. This term also includes any department, agency, or instrumentality of the United States, a State, a political subdivision of a State, or an Indian tribe engaged in an activity described in the first sentence of this paragraph.
