Initial & Recurrent  
U.S. Dept. of Transportation 49CFR

ONLINE TRAINING COST: (\$175.00 each for 1- 4 Students)  
(\$150.00 each for 5-24 Students)  
(\$125.00 each for 25-49 Students)  
(\$100.00 each for 50-99 Students)

## CATALOG DESCRIPTION

Provides the training required and outlined under U.S. Department of Transportation Title 49 Code of Federal Regulations (DOT 49CFR), Part 172, Subpart H for transporting non-placarded hazmat shipments. **This training is mandatory for any driver transporting hazmat without CDL (less than 1,001lbs).**

This course provides familiarity with the requirements of U.S. Department of Transportation Code of Federal Regulations (49CFR) and enables the employee/student to recognize and identify hazardous materials consistent with the hazard communication standards. It is a systematic program that ensures a hazmat employee/student has familiarity with most of the requirements of being a hazardous materials driver, and will be able to recognize most hazardous materials and has knowledge of emergency response information, self-protection measures and accident prevention methods and procedures.

NOTE\*: This training does not meet the requirements for a hazmat endorsement on your commercial drivers license (CDL).

## LEARNING OBJECTIVES

At the conclusion of this course, the student will be able to:

- a. Recognize who regulates what in terms of hazardous materials in transportation. United States rules & regulations versus international rules & regulations.
- b. Be able to define what a hazardous material is.
- c. Recognize the meaning of most proper marks and labels for a shipment to determine the type of risks it carries.
- d. Recognize DOT motor vehicle inspection requirements.
- e. Recognize proper loading, unloading, segregation & compatibility of loads.
- f. Understand the basic precautions to be taken when handling hazardous materials.
- g. Recognize security risks related to the transportation of hazardous materials in commerce.
- h. Be able to understand shipping papers
- i. Be able to determine when placarding is necessary.

Through all of this, emphasis will be placed on each student's responsibility when transporting hazardous material.
